DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/22/03 has been entered.

Claim 101 has been cancelled.

Claims 98-100, 102-106, and 119-130 are pending.

The rejection under 35 U.S.C 112, first paragraph, and the rejection under 35 U.S.C 103(a) stated in paper No. 20 have been withdrawn in view of applicant's amendment.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1746

3. Claims 98-100, 102- 106, and 119-130 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 98, 122, and 127 are indefinite in the recitation of "heated aqueous solution", because heated is relative term.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 98-100, 102-106, and 119-130 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohmi et al. in combination with JP 4-125927 (JP' 927).

Ohmi et al. as discussed supra in paper No. 12 teach a method of cleaning a surface of semiconductor wafer. The reference teaches the rotating, spraying, and removing steps as claimed.

Ohmi et al. do not teach using the heated solution as claimed.

JP'927 teaches a method for cleaning wafers. The reference teaches spraying the wafer with hot sulfuric acid, or a form of hot sulfuric acid in which water-containing ozone has been added, onto the wafer surface. The reference also teaches that ozone constantly surrounds the wafer within the treatment tank.

It would have been obvious for one skilled in the art to use the heated solution taught by JP'927 in the Ohmi et al process to obtain the claimed process. This is because the ozone cause oxide decomposition to occur, and the higher the temperature, the greater the oxide decomposition effect from the ozone.
